# ANNUAL REPORT

OF THE

# DIRECTOR-GENERAL OF ARCHÆOLOGY

FOR THE YEAR

## 1909-10.

### PART I.—ADMINISTRATIVE

- 1. The main works of conservation carried out in the Northern Circle re- Conservation. lated to the Mughal palaces in the Forts of Agra, Delhi and Lahore. Akbar's palace in the Agra Fort now approaches completion. The other buildings here which received special attention were the Angūrī Bāgh, the Amar Singh Gate, the Chitori Gate and the Moti Masjid. In the Delhi Fort also the improvement of the historical buildings is being carried on systematically. The whole group of the palace buildings of Shah Jahan has been fenced off and the resuscitation of the main palace garden, Hayat Bakhsh, has made constant progress, the ancient waterchannels and causeways having been completely restored. Among other buildings at Delhi, I must mention the Tomb of Humāyūn where the waterchannels in the garden were repaired, the Khirki Masjid, the repairs on which were completed, and the Moth ki Masjid on which some preliminary repairs were carried out. In the Lahore Fort material progress is hindered by the fact that the oldest portion of the Mughal palace is still being occupied for utilitarian purposes. It is gratifying to record that in November 1909 a Committee of Military experts met at Lahore to consider the feasibility of resigning certain buildings in the Fort for conservation as ancien monuments, Mr. R. Froude Tucker, the Archæological Surveyor, Northern Circle, being present. In the course of the year Mr. Tucker examined the Diwan-i-'am in the Lahore Fort with interesting results. Other ancient monuments near Lahore which received attention are the garden of Jahangir's Tomb at Shāhdara with the adjoining Sarāī and the Tomb of Nūr Jahān and also the Shālimār Gardens. For particulars I may refer to Mr. Tucker's Progress Among Hindu monuments in the Northern Circle I must mention the ancient brick temple at Bhitargāon in the Cawnpore district which was repaired at a cost of R1,106.
- 2. In the Western Circle the work of conservation has been very considerable comprising not less than sixty-six items in the Bombay Presidency alone. The list published by Mr. Cousens in his Progress Report comprises Buddhist, Brahmanical, Moslem and Christian monuments. Extensive repairs were carried out on the well-known Brahmanical cave temples of Elephanta. The Buddhist caves at Nāsik also received due attention, and likewise the Hindu temples at Gadag. Among Muhammadan monuments those at Aḥmadābād and Bījāpur rank prominently. At Sarkhēj near the former place the Harem, the ruined palace and the mosques of Malik Isan-ul-Mulk and of Sayyid Usmān were preserved. The buildings at Bījāpur on which repairs were carried out are the Jal Mandir, the Āṣār Maḥal, the Ibrāhīm Rauza (rebuilding roof in Mezzanine Gallery) and some minor edifices. Finally I mention the old Portuguese Fort at Revadaṇḍa, Kolaba District.

- 3. It is gratifying to note that in the Hyderabad State special attention is being paid to the preservation of ancient buildings. The Nizam's Government has shown its enlightened interest in the matter by extending their care both to Moslem and pre-Moslem monuments. At the instance of Lord Minto the restoration of the Tower of Victory at Daulatābād has been undertaken at an estimated cost of R13,919. At Aurangābād that of the so-called Bībī kā Maqbarah (i.e., the Mausoleum of Rubia-ud-Daurānī, the wife of Auranzēb) has likewise been taken in hand, the cost being estimated at R5,000. A similar amount is proposed to be spent on the Mosque of Gulburgah. For repairs to the wellknown cave temples of Ellora a sum of R6,329 was sanctioned and the work reported to be in progress. For the not less famous caves at Ajanta an estimate of R13,919 has been prepared. Whereas the Nizam's Government is thus displaying a singular activity and liberality in the preservation of national monuments, the States of Central India and Rajputana have shown little zeal in this matter. No works of any importance were carried out with the only exception of that of preserving the temples at Khajuraho in the Chattarpur State of Bundelkhand which is making constant progress under the able superintendence of Mr. R. A. Manly. No less than ten temples were repaired at a cost of R19,056, supplied by the Government of India.
  - 4. In the Eastern Circle the works of conservation number not less than 105 cases, the great majority of which (64) relate to buildings in Western Bengal. Here also the monuments repaired are both numerous and varied in their character. The work of clearing the sand from the compound of the Black Pagoda at Konārak in Orissa was continued. Measures were taken for the protection of the Maniyar Math at Rajgir, the ancient Rajagriha, in the Gaya district. The two Asoka capitals of Rampurva in the Champaran district were removed to the Calcutta Museum. The repairs on the Dargah of Makhdum Shāh and the conservation works on the tank south of the Dargah were continued. An obelisk was erected on the battlefield of Plassey. The most important works in Assam related to the temple of Hayagriva at Hajo in the Kamrup district, the two temples on the north bank of Jaysagar near Sibsagar and the Bishnudole temple in the same division. In Eastern Bengal the work of preservation on the Mosque of Kusumbha was brought to completion. In the Central Provinces two important works were carried out in the Bilaspur district, namely, the restoration of the two Hindu temples at Janjgir which was completed, and the repairs to the Mahādēō Temple at Pāli. The re-building of the walls of the Śiva temple at Deo Baloda, the repairs to the Jami' Masjid and some other monuments at Burhanpur were likewise brought to completion.
    - 5. As regards conservation in the Southern Circle, attention centres in the important group of partly ruined buildings at Hampi, the ancient Vijayanagar, which, though not among the oldest monuments of the Deccan, possess such unique interest for the history of Southern India during the 14th and 15th centuries. A sum of nearly R8,000 was spent on the Vijayanagar buildings in the year under review. Other important works in this circle were the preservation of the rock fort at Gooty in the Anantapur district and repairs to the Gandikota temple in the Cuddapah district. Measures were also taken to preserve the ancient fort wall of Georgetown at Madras. The number of works of preservation in the Southern Circle comes to sixty-four. In Burma the chief works of conservation concerned the Mandalay palace, the spire of which was rebuilt, and the monuments of Pagan. In the Frontier Circle the work of conserving the Buddhist site at Takht-i-Bāhi was continued and considerable progress made

For further particulars I may refer to the progress reports of the respective circles.

6. It was pointed out in last year's Report that with regard to the application Ancient of the Ancient Monuments Preservation Act there exists a considerable diver- Act. gence of opinion, and consequently a great variance of action in the different provinces. In the matter of declaring ancient monuments protected, the Act is certainly nowhere better understood and applied with greater success than in the Bombay Presidency. Here no less than 105 monuments were declared protected, including the Buddhist Stupa at Mirpur Khas in Sind, the Pando Lēnā caves at Nāsik and the old Dutch Factory at Vengurla in the Ratnagiri In the Northern Circle the progress has been much slower. Panjāb twenty-four Brahmanical and Buddhist buildings were declared protected by notification of 9th December 1909, the proposal having been made by the Superintendent on the 9th March 1907. It appears that the delay in giving effect to the proposal was partly due to objections raised by district officers. Another difficulty is the circumstance that several of the monuments in question are not distinct buildings but ancient sites. It is, however, evident that protection of the latter against the depredations of treasure seekers is often even more wanted than that of well-preserved and well-defined monuments. In the Panjab not a single Muhammadan monument was declared protected in the course of In the United Provinces the number of buildings which were declared protected was not more than four. But the Archæological Surveyor has made proposals with regard to twenty-three Muhammadan monuments in the Panjab, seven in the United Provinces and one in Ajmir. It appears that in each and every case the proposal emanated from the Archæological Officer. In the Frontier Circle the ancient site of Taxila situated in the Hazara district was declared protected. In Burma twenty-one monuments were declared protected and in Bengal eight.

In Burma section 18 (1) of the Act prohibiting the removal of sculptures, inscriptions and other antiquities from certain areas was applied to not less than twenty-eight localities.

7. A new scheme has been framed for the listing of ancient monuments Listing of The proposed list will contain every monument, ancient site, or other archæological relic with a full account of their history and the legends connected with them, their archæological and artistic features, their inscriptions, their present condition and the measures necessary to secure their safety. The monuments will be dealt with according to their geographical distribution and an archæological map of each district will be added with full bibliographical references, photographic illustrations and a complete index. giving a full account of each individual monument, it it proposed also to preface the volumes with general chapters dealing respectively with the history, topography, art, architecture and numismatics of the province and thus to make the work a complete compendium of all branches of archaeology. In Rajputana Mr. Bhandarkar has been able to devote most of his time to the listing of monuments, with the result that constant progress has been made. The States in which materials for the proposed list have been collected in the year under review are Jaipur and Jodhpur. In Burma Mr. Taw Sein Ko prepared lists of ancient monuments and historical sites for the Mandalay and Sagaing Divisions. Descriptive lists of monuments are badly wanted for Central India and the North-West Frontier Province, both territories particularly rich in archæological remains. For all other provinces more or less complete and accurate lists exist, but they require constantly to be revised and supplemented.

Museums and minor antiquities.

- 8. With regard to museum administration the most important fact to be recorded is the passing of the Indian Museum Act on the 18th March 1910, in section 2(1)(a) of which it has been laid down that the Director General of Archæology will be one of the Trustees of the Museum. How far this measure will tend to remedy the long neglect, from which the archæological section has suffered, will largely depend on the special staff of experts which the Director General will be able to employ on museum work. As a preliminary measure the Government have sanctioned the appointment of an Indian Assistant Superintendent, on the understanding that the Director General should be at liberty to depute either him or any other member of his staff for work in the Calcutta Museum.
- 9. In the United Provinces the year under review has been one of singular progress with regard to museum administration. It has been decided by the Local Government that the Provincial Museum, Lucknow, which was hitherto housed in two of the Oudh palace buildings, ill-suited for the purposes of a museum, will be transferred to a more spacious and suitable edifice in the Kaisar Bágh, up to recently occupied by the Canning College and purchased by the Local Government for the sum of R2,10,000. The Archæological Department has been consulted on the manner in which the different sections could be best distributed over this building. The new museum at Sārnāth is now nearly completed, except for some decorative details. As soon as the inner fittings are finished, it will be possible to remove the sculptures and inscriptions into the new building. Some repairs have been carried out to the Municipal Museum at Muttra (Mathurā), so as to provide more space and light. of these repairs had been estimated at R4,000, to which the Government of India contributed a grant of R2,000 on the understanding that an equal sum should be found locally. But after the sum of R2,000 granted by the Government of India had been spent, the Municipal Board of Muttra declared themselves unable to provide the remainder, so that a considerable part of the proposed work had to be abandoned. Here I may also mention that the Trustees of the M. A. O. College at Aligarh intend establishing a museum at that place.
- 10. In the matter of antiquarian collections the Bombay Presidency does not occupy as prominent a place as in other branches of archæological activity. We may fortunately look to improvement, when the Prince of Wales' Museum at Bombay will be ready, in which it is hoped proper provision will be made for an archæological section representative of Western India and placed under expert management. A Board of Trustees which includes the Superintendent of Archæology has been constituted. It is understood that the collection of antiquities preserved in the Superintendent's office at Poona will be made over to the Prince of Wales' Museum. The Archæological section of the Victoria and Albert Museum at Bombay is very poor. reported that in the course of the year this Museum lost its collection of gold coins by theft. Further particulars are not available, but it may serve as a warning not to exhibit valuables without proper precautions being taken for their safety. In the case of coins, it deserves recommendation to exhibit only electrotyped imitations, the originals being kept in a safe or strong room.

Acq : siticus

11. The most valuable acquisition made in the course of the year was that of the important collection of gems brought together by the late Colonel G. G. Pearse. It was purchased by the Government of India at a cost of R3,900

nd has been deposited in the Indian Museum, Calcutta. It is hoped that it will shortly be possible to make proper arrangements for its exhibition. Besides, a considerable number of ancient coins were acquired for the Calcutta Museum, ncluding Mughal coins which were purchased for R1,098 from the Bahawalpur State. The collection of Tibetan antiquities brought together by Mr. A. H. Francke in the course of his tour in Indian Tibet will also be placed in the Calcutta Museum. The Delhi Museum of Archæology was enriched with some robes and jewellery once in the possession of Zinat Mahall Begam the wife of Bahādur Shāh, the last king of Delhi. Among other objects I mention some ancient Mughal paintings and an autograph of General Nicholson. collection of coins relating to the different dynasties which once ruled at Delhi was completed with the assistance of Mr. R. B. Whitehead, I.C.S. archæological section of the Madras Museum was augmented by certain copper plates purchased by Mr. Rea for R30. For the Poona Museum also some old pictures and coins were obtained through Mr. Cousens. The Mathurā Museum collection was again increased with a number of sculptures and inscriptions acquired locally by Pandit Radha Krishna. The total expenditure on the purchase of antiquities amounted to R10,700.

12. Regarding Treasure Trove acquisitions the following information has Treasure been received. In the Panjab 202 coins were examined, the great bulk being Mughal silver coins. Of these a number of 109 were distributed among various Museums. In Ajmer 257 mediæval coins were examined. The Asiatic Society of Bombay reported on 739 coins, out of which 421 were distributed. In the Central Provinces 1,605 coins were examined, and 994 out of the number were a gold reliquary from Amaravatī was acquired, some copper and bronze images, a copper treasure chest containing jewels for idols, and two copper plates of the 18th century. Among the coins there are two Roman silver coins, which were received from the Collector of Coimbatore. One appears to be a coin of Quintus Cassius Longinus (60 B.C.) and the other which is very much worn appears to be one of Augustus.

13. In last year's report mention was made of the discovery of an im-Exploration. portant inscription on a stone column at Besnagar in Gwalior State. It records

that this pillar was erected by one Heliodoros, the son of Dion who calls himself a Bhagavata (i. e., a worshipper of Krishna) and came from Taxila in the Panjab as an ambassador of King Antialkidas. After this interesting discovery Mr Marshall was anxious to carry on some excavation on the site which is known to be that of the ancient city of Vidisa. The Gwalior Darbar, however, preferred to have the work done by one of the State officials, the results of whose diggings have just been made public. Mr. Marshall had to fall back on the ancient site of Bhītā near Allahābād which is that of a country town without any recorded history. The town, however, ceased to exist during the Gupta period and the comparatively early date of the surface remains has made it possible to reach strata of a remoter Indian civilisation than have hitherto been accessible to the spade. Mr. Marshall's explorations throw much light on the domestic architecture of that early period and have yielded numerous minor antiquities, such as inscribed sealings and well-preserved terra-cottas, some of which appear to be pre-Mauryan.

14. The discovery of the relic-casket of King Kanishka in a tumulus near Peshawar has been one of the most remarkable of last yea's results. The relics transferred in a new golden casket were made over to a deputation of Burmese Buddhists by H. E. the Viceroy and it is understood that they will be worthily enshrined in a new Pagoda at Mandalay. Further exploration of Shāhjī-kī-dhērī, the mound in which the casket was found, had to be postponed owing to claims having been raised by the owner of the site which had to be settled by litigation. Dr. Spooner, therefore, resumed excavation at Sahri Bahlōl which in 1907-08 had yielded such valuable finds. In the present year the results achieved proved not less satisfactory. Dr. Spooner unearthed a large number of Graeco-Buddhist sculptures of a very superior class, including some new scenes of Buddha's life and a series of Jātakas. His finds include a Sassanian silver coin.

15. In the Northern Circle no exploration was done owing to my absence on leave, with the exception of the discovery of stray sculptures and inscriptions made at Muttra (Mathurā) by Pandit Radha Krishna. These have all been placed in the local museum. With reference to the inscribed pieces, it is noteworthy that the majority belong to the reign of the Kushaṇa King Huvishka. The Pandit's discoveries also bear out the fact that side by side with Buddhism and Jainism there flourished in ancient Mathurā the popular cults of the Nāgas and the Yakshas. In the Eastern Circle no works of exploration were undertaken owing to the lamented death of Dr. Bloch which occurred in the beginning of the cold season.

16. In the Western Circle the most notable work of research was the excavation of a Buddhist  $St\bar{u}pa$  at Mīrpur Khās in Sind which resulted in the discovery of a gold reliquary and terra-cotta Buddha figures of excellent workmanship. Mr. Cousens has arrived at the conclusion that in the early centuries of the Christian era, the prevailing religion of Sind was Buddhism. In the Southern Circle Mr. Rea continued his excavation of the Buddhist site of Rāmatīrthan, Vizagapatam district, and unearthed several more buildings, chiefly chaityas, and long rows of cells for the accommodation of the monks. Mr. Taw Sein Ko conducted excavations at the Singyidaing Pagoda, Kanthonzindaung and the Atwin Moktaw Pagoda at Hmawza and at Yathemyo, 5 miles to the east of Prome.

Mr A. H. Francke's tour in Indian Tibet.

17. For a special work of research in territories bordering on Tibet the Government of India have been fortunate in securing the services of the well-known Tibetan scholar, the Rev. A. H. Francke, of the Moravian Mission. During the months of June-November Mr. Francke made an extensive tour of exploration through the Indo-Tibetan frontier districts of Bashahr (Kanāwar), Spiti, Rubshu, and Ladakh, in the course of which he collected valuable epigraphical material bearing on the history of those regions. many important discoveries made by Mr. Francke I wish only to mention that of the key to the script used in the seal of the Dalai Lama which had hitherto puzzled Tibetan scholars. Mr. Francke was accompanied on his tour by Babu Pindi Lal, photographer attached to the Frontier Circle, who brought back one hundred and sixty excellent photographs showing views, buildings and antiquities of those little frequented mountain tracts. nature of the country made the task of Mr. Francke and of his assistant a very arduous one, but results of unusual interest have rewarded their labours. I wish here to give expression to my gratitude to the Moravian Mission Board for thus generously placing Mr. Francke's invaluable services at the disposal of this Department.

18. 1 The inscriptions copied or brought to light during the period under Epigraphy. review number about 1,120. This number is the highest on record and is accounted for by the Muhammadan inscriptions which have gone up to 205.

- In the Frontier Circle, the excavations at Sahri Bahlol yielded a certain number of potsherds inscribed in Kharoshthi characters. A Persian epigraph of the time of Shah Jahan was discovered by Mian Wasi-ud-Din in a mosque in Peshawar city. It is dated in A. H. 1039 (A. D. 1629) and records the building of a bridge near that town.
- In the Northern Circle, Pandit Radha Krishna has continued his labours on behalf of the Mathura Museum with undiminished enthusiasm and has acquired a considerable number of inscribed sculptures. Ten inscriptions have been copied, of which nine belong to the Kushana period and range in date from the year 31 to the year 84. Four are of the time of Huvishka and the one dated in the year 84 belongs to that of Vasudeva. Dr. Vogel has found additional proof of the prevalence of Naga worship in ancient Mathura in an inscribed statuette which was being worshipped as Dau-ji, i.e., Baldev in a temple in the city of Mathura. The inscription is dated in the year 52 and shows that the statuette was made during the reign of Huvishka. It is only twelve years later than the Chhargaon Naga statue set up in the year 40 and in the reign of the same king. At Mora, Dr. Vogel has found the remains of a building with considerable fragments of images in the Kushana style which belong apparently to four standing figures, three male and one female. He connects these fragments with the "images of the five heroes" mentioned in the Mora inscription of the Great Satrap Rajuvula. case, the inscription on the female figure, dated during the reign of Huvishka, would show that Rajuvula and his son were not independent rulers of Mathura, but governors under the Kushana king Huvishka, provided the two records are contemporaneous.
- 21. In the Archæological Surveyor's section Maulvi Muhammad Shu'aib has copied sixty-one Muhammedan inscriptions and Mr. Zafar Hasan, the Government of India scholar, one hundred and forty-four. One of the former found at Hansi in the Hissar District (Panjab) is dated in A. H. 593 (A.D. 1197) during the reign of Shahabud-din Ghōrī and is one of the oldest Musalmān inscriptions in India. Another in the Purānā Qila' (Indrapat) near Delhi records that "12 bighas of land with a pucca well near the Qila' Kuhna" were bought and a "temple of Shri Krishna Bhagwan was erected." income of the land was to be spent on the temple.
- 22. In the Eastern Circle, duplicate estampages were taken of all the remaining inscriptions at the old stone temple of Markanda Rishi at the village of Markandi in the Central Provinces. An estampage has also been prepared of the big Sirpur inscription now in the Raipur Museum.
- 23. In the Western Circle, impressions have been taken of forty-two inscriptions. One of them found at Chatsu in Jaipur State, which though not dated, cannot be later than the tenth century A.D., gives an account of an entirely new Guhila dynasty. It records the erection of a temple of Murāri by the Guhila king Bālāditya in memory of his dead queen Rattavē, daughter of the Chāhamana king Sivarāja. At Jinmāta (Jaipur State) the date V. E. 1162 has been found for the imperial Chahamana king

<sup>&</sup>lt;sup>1</sup> Sections 18-25 of the present report have been contributed by the Government Epigraphist Rai Bahadur V. Venkayya.

Prithvīrāja I. and V. E. 1196 for Arņōrāja of the same dynasty. The earliest inscription discovered in the Western Circle during the last field season was found at Sakrāī, not far from Jinmātā. The date is Samvat 879 and the inscription records the rebuilding of a Mandapa by certain merchants in front of the goddess Śankarā who is now called Śākambharī.

- 24. In the Southern Circle, 789 inscriptions have been copied by the Assistant Superintendent, of which six are copper-plates and the rest stone inscriptions. The earliest of all the inscriptions discovered by the Department during the year are from Southern India where two more caverns with rock-cut beds and Brahmi epigraphs were brought to light in the Madura District. stone inscription from Olakkur in the South Arcot District (No. 356 of 1909) furnished the name of a hitherto unknown king (or chief), viz., Prithivi-vitapankura Adiyaraiyan who probably belonged to the Pallava family. Pallava king is Dantinandivarman known from an inscription at Tiruvellarai near Trichinopoly who claims to belong to the Brahmakshatra family. Of the copper-plates, one is dated in A.D. 674 and belongs to the reign of the Western Chalukya king Vikramaditya I. It proves that he advanced as far south as the banks of the river Kāvērī in his expedition against the Pallavas of Kāñchī. Another copper-plate grant belongs to the Eastern Chalukya king Ammarája II. (A.D. 945-70). Its historical portion is almost identical with that of the Mahiyapundi grant (Ep. Ind., Vol. IX, pp. 47-56). The Bezwada inscription of Yuddhamalla is an interesting ancient Telugu record in verse which may be assigned to the 9th century A.D. It shows that literary Telugu flourished even before the time of the earliest known Telugu work composed in the 11th century A.D. It is worthy of note that a portion of this inscription has to be read from the bottom upwards. The remaining inscriptions of the Southern Circle belong to the Pallava, Ganga-Pallava, Chola, Pandya, Western Chālukva, Kākatīva, Hovsala and Vijavanagara dynasties and to the kings of Among the minor families represented in the collection for 1909-10 are the Ummatur chiefs, the Nayakas of Madura, the rulers of Mysore, the Reddis of Kondavidu and the Qútbshāhīs of Golkonda.
- 25. In Burma estampages of fifty-three inscriptions were procured from the Prome, Rangoon, Pegu, Magwe, Thayetmyo and Sagaing districts. Of these, twenty-six arr in the Talaing language, while the rest are in Burmese dating from the 12th and later centuries of the Christian era.

26. In connection with Dr. Spooner's excavations, a complete survey of the Sahrī Bahlōl site was made by Mr. A. J. Wilson, late of the Survey of India. The map, on which all mounds within a radius of two miles of the main village are shown on a scale of 6" to the mile, will be of distinct use to scholars, as the locality is archæologically one of the most important in the Frontier Circle. Mr. Cousens, in the course of his excavation of the Buddhist stūpa at Mīrpur Khās, had four drawings of that monument prepared to which are to be added two very fine coloured drawings of a glass bowl and pottery unearthed at Brāhmanābād Mansūrah in the previous year. Under Mr. Tucker's supervision eight more drawings of buildings in the Agra Fort were prepared. Mr. Longhurst had eleven drawings made relating to monuments in the Central Provinces. Seven more drawings of the Mandalay Palace were made and the entire set was expected to be completed by the end of June 1910.

Contravention of standing orders. 27. The only cases of contravention of standing orders are reported from Burma. It appears that some damage was done to the outermost walls of the

i (wings

Fort at Ara and also to the Shwezigon Pagoda and other buildings. In the former instance the injury was due to Public Works Department contractors and in the latter to treasure hunters. After a personal inspection, the local Superintendent made a report to the Deputy Commissioner, Sagaing, who issued orders to prevent further vandalism. In the same locality, the circuit walls of certain historical monasteries were broken down in the course of repairs to the Sandamani Pagoda.

28. In the course of his cold winter tour Mr. Marshall visited Peshawar, Tours Delhi, Agra, Ajmer, Chitorgarh, Eran, Calcutta, Bankipore, Mau, Bhikna, Panchpahari, Benares, Allahabad, Muttra, Parkham, Bhita, Bombay, Poona, Bhaja, Hallebid, Belur, Madras, Bayana and Ambala. Mr. Venkayya, the Government Epigraphist, visited Calcutta, Waltair, Benares, Sarnath, Agra, Delhi, Muttra, Gokul, Allahabad, Vizagapatam, Madras, Ootacamund, Anakapalle, Gaya, Bodh Gaya and Lucknow. Details of the tours accomplished by the Superintendents and Assistant Superintendents will be found in the Provincial Progress Reports.

29. The Archæological Reports published during the year under review Publications comprise the Annual Report, Part I, for 1907-08, and Part II for 1905-06 and 1906-07, eight Provincial Reports and Parts VII-VIII of Volume IX and Parts I-IV of Volume X of the Epigraphia Indica. Two illustrated monographs were brought out, namely Pallava Architecture by Mr. Alexander Rea. and Akbar's Tomb, Sikandarah by the late Mr. Edmund W. Smith. These two important works form volumes XXXIV and XXXV, respectively, of the Imperial Series of Archæological Survey Reports. The volume on Akbar's Tomb was edited by Mr. Marshall with the aid of Mr. Nicholls and Dr. Horovitz from papers and notes left by the late Mr. Edmund Smith. It is gratifying to mention in this connection that the Government of India have sanctioned the publication of seventy-six plates containing one hundred and sixteen coloured drawings relating to tile mosaics on the Lahore Fort. It has been decided that the plates will be preliminarily published in five consecutive numbers of the Journal of Indian Art and afterwards as a Report of the Archæological Survey. The cost of publication has been estimated at £550.

30. In the course of the year the Central Library was augmented by Library. some 650 volumes, of which some 250 were obtained either by exchange or free and the rest purchased. The books acquired by purchase include some valuable works relating to classical archæology such as Conrad Cichorius. Die Reliefs der Traianssäule (Berlin 1896-1900), Petersen, Domaszewski and Calderini, Die Marcussäule (Munich 1896), Hermann Thiersch, Pharos Antike (Leipzig and Berlin 1909) and Theodor Schreiber, Die Hellenistischen Reliefbilder (Leipzig 1889-94). The Byzantinische Zeitschrift, of which volumes I—X and XVIII were obtained, is another important acquisition. An arrangement was made with the Pāṇini Office, Allahabad, for the exchange of publications.

31. The Department has suffered a great loss by the death of Dr. T. Personnel. Bloch which occurred on the 20th October 1909. During the nine years he was connected with the survey he has carried on valuable research work, the results of which published in Reports and Oriental Journals bear testimony to his wide knowledge of Indian antiquities and languages. Dr. M. A. Stein was appointed to succeed as Superintendent of the Eastern Circle, but as he was on special deputation in England, Mr. A. H. Longhurst was selected to

officiate in Bengal and had to return from the Panjab where he was then acting for me as Superintendent of the Northern Circle. He joined on the 26th November, having left Pandit Hirananda in charge of the Lahore Office from 24th November till 3rd January 1910 when I returned from combined leave.

- 32. By Home Department letter No. 31, of the 18th January 1910, the Government of India sanctioned the appointment of an Assistant Superintendent, Archaeological Survey, on a pay of R300—25—500 a month, to be attached to this office, to enable the Director General to depute from time to time either the officer in question or another member of his office staff to assist in the supervision of the archæological section of the Indian Museum. Pandit Daya Ram Sahni was selected for the post which was to be a gazetted one. Babu Rakhal Das Banerjee was appointed to succeed Pandit Daya Ram as Excavation Assistant on a pay of R200—10—250 per mensem and it was decided that the services of the former would be placed at the disposal of the Trustees of the Indian Museum, pending a final decision on the question of transferring the archæological section of the Museum to this Department.
- 33. Pandit Natesan Aiyar and Maulvi Zafar Hasan continued to hold the Government of India archæological scholarships for Sanskrit and Arabic-Persian respectively.

J. PH. VOGEL, PH. D.,
Officiating Director-General of Archaeology in India.

### APPENDIX A.

Special grant-in-aid.—The lakh of rupees provided by the Government of India for assisting the Local Governments in special archæological works was allotted as follows:—
